Market Outlook:

US Stocks recovered from heavy losses in the afternoon trading Monday, but traded still favoring the bear as the investors were jittery about Greece as well as an increase in Portugal's borrowing cost.

The Indian markets are seen opening slightly positive tracking the positive trend in Asia, but action may remain largely stock-specific due to the earnings season. The trading range for NSE Nifty in the morning session is between the Critical support at 5066 and the first resistance at 5105. The European market cues have an impact from the midsession onwards and after the consolidation if the index sustains above 5105, there can be a major resistance at 5136. However below 5066, the weakness can creep in once again and the lower support is at 5038. A fall from this level can invite fresh short positions where in which the benchmark may find support at 5002.

Economy / Sector News

Core sector growth slows to 3.1% in Dec

The growth rate of eight core industries has slowed down to 3.1 per cent in December last year from 6.3 per cent in the same month previous year. These eight core sectors have a combined weight of 37.9 per cent in the Index of Industrial Production (IIP). The sectors that dragged down the growth in December last year due to a fall in output include crude oil, natural gas, petroleum refinery products and steel, while those which fared better include coal, fertiliser, cement and electricity.

These eight sectors had recorded a 6.8 per cent growth in November last year. The growth of these eight sectors during April-December 2011 was 4.4 per cent against 5.7 per cent during the corresponding period in 2010

Telecom merger deals to be freed of spectrum transfer charge

In a bid to encourage consolidation in the sector, the Telecom Commission has decided against imposing a spectrum transfer charge on Merger and Acquisition deals. The Department of Telecom had earlier proposed imposing a fee akin to the duty paid to Government every time property changes hand. This was aimed at preventing fly-by-night players from making windfall gains by selling spectrum after taking it from the Government at below-market prices. The Telecom Regulatory Authority of India had proposed that the Government should charge 5 per cent of the difference between the transaction price and the market price as spectrum transfer fee.

Interest costs hurting oil marketing companies

Delay in government compensation and inability to raise prices are not the only dragging factors for oil marketing companies (OMCs) — Indian Oil, Bharat Petroleum and Hindustan Petroleum. With higher borrowings and firm interest rates, their interest cost is expected to rise sharply this financial year and cause losses.

IOC, BPCL, HPCL hit by rising working capital needs that have led to a combined borrowing of Rs 110,000 crore. For Indian Oil, the interest cost for this financial year is expected to touch an all-time high of Rs 5,000 crore, compared to Rs 2,670 crore last year. In the first six months, the interest burden stood at Rs 2,521 crore. The interest cost of these companies is expected to be Rs 8,000 crore, against Rs 4,654 crore last year. Currently, the OMCs incur an under-recovery of Rs 388 crore a day.
